1994 Journal of Fluids Engineering Index
Index by Subject Matter to JFE, Vol. 116
Nos. 1–4, 1994

AERO AND HYDROACOUSTICS

Hydrodynamic Design Considerations for Hydroacoustic Facilities: Part I—Flow Quality, J. M. Wetzel and R. E. A. Arndt, June, 324–331.

Hydrodynamic Design Considerations for Hydroacoustic Facilities: Part II—Pump Design Factors, J. M. Wetzel and R. E. A. Arndt, June, 332–337.

Numerical Study on the Mechanism of Wind Noise Generation About a Car-Like Body, Ming Zhu, Yuji Hanaoka, and Hideaki Miyata, September, 424–432.

Mechanisms and Directivity of Unsteady Transonic Flow Noise, A. S. Lyrintzis, J. Lee, and Y. Xue, September, 649–652.

Review: The Use of Kirchhoff's Method in Computational Aeroacoustics, A. S. Lyrintzis, December, 665–676.

BLUFF-BODY FLOWS

Asymptotic Wake Behavior of Swept, Blunt Trailing-Edge Airfoils, G. V. Shelby and F. H. Miandoab, March, 171–174.

Three-Dimensional Recirculation Flow in a Backward Facing Step, Chiang Shih and Chih-Ming Ho, June, 228–232.

Mean Pressure Distribution and Drag Coefficient of Wire-Wrapped Cylinders, E. E. Yang, H. R. Rahai, and A. Nakayama, June, 376–378.

A Correction Formula for Wall Effects on Unsteady Forces of Two-Dimensional Bluff Bodies, Terukazu Ota, Yasunori Okamoto, and Hiroyuki Yoshikawa, September, 414–418.

The Minimum Drag Profile in Laminar Flow: A Numerical Way, Ram K. Ganesh, September, 456–462.

BOUNDARY LAYER AND SHEAR FLOWS

Cavity Flow Predictions Based on the Euler Equations, Manish Deshpande, Jinzhang Feng, and Charles L. Merkle, March, 36–44.

Toward a Pointwise Turbulence Model for Wall-Bounded and Free Shear Flows, Uriel C. Goldberg, March, 72–76.

Flow Patterns of Falling Liquid Film Observed Near an Obstacle, Kenji Katoh, Hideomi Fujita, and Masato Takaya, December, 801–807.

COMPUTATIONAL METHODS

Perspective: Future Research Directions in Computational Fluid Dynamics, R. W. Douglass and J. D. Ramshaw, June, 212–215.

Perspective: A Method for Uniform Reporting of Grid Refinement Studies, P. J. Roache, September, 405–413.

On the Unsteady and Turbulent Characteristics of the Three-Dimensional Shear-Driven Cavity Flow, S. A. Jordan and S. A. Ragab, September, 439–449.

Supersonic Flow Calculations Using a Reynolds-Stress and a Thermal Eddy Diffusity Turbulence Model, T. P. Sommer, R. M. C. So, and H. S. Zhang, September, 469–476.

Investigation of Fully Developed Turbulent Flow in a Straight Duct With Large Eddy Simulation, M. D. Su and R. Friedrich, December, 677–684.

Performance Analysis of Viscous Flow Computations on Various Parallel Architectures, D., Drikakis, E. Schreck, and F. Durst, December, 835–841.

Discrete Vortex Simulation of Pulsating Flow Behind a Normal Plate, Hyung Jin Sung, Young Nam Kim, and Jae Min Hyun, December, 862–869.

Navier-Stokes Simulation of the Flow Around an Airfoil in Darrieus Motion, Ko-Foa Tchon and Ion Paraschivoiu, December, 870–876.

FLOW CONTROL

Optimum Suppression of Fluid Forces Acting on a Circular Cylinder, H. Sakamoto and H. Haniu, June, 221–227.

Turbulent Flow Past a Surface-Mounted Two-Dimensional Rib, S. Acharya, S. Dutta, T. A. Myrum, and R. S. Baker, June, 238–246.

Friction Factor for Flow in Rectangular Ducts With One Side Rib-Roughened, B. Youn, C. Yuen, and A. F. Mills, September, 488–493.

Evaluation of Flip-Flop Jet Nozzles for Use as Practical Excitation Devices, Ganesh Raman, Edward J. Rice, and David M. Cornelius, September, 508–515.

Performance of S-Cambered Profiles With Cut-Off Trailing Edges, Baby Chacko, V. Balabaskaran, E. G. Tulapurkara, and H. C. Radha Krishna, September, 522–527.

Actively Controlled Radial Flow Pumping System: Manipulation of Spectral Content of Wakes and Wake-Blade Interactions, O. Akin and D. Rockwell, September, 528–537.

FLOW MEASUREMENTS

Estimating Uncertainty in Computations of Two-Dimensional Separated Flows, Ayodeji O. Demuren and Robert V. Wilson, June, 216–220.

Particle Tracking Velocimetry Using Laser-Beam Scanning and Its Application to Transient Flows Driven by a Rotating Disk, S. Ushijima and N. Tanaka, June, 265–272.

The Effect of Sensor Size on the Performance of Flush-Mounted Hot-Film Sensors, M. J. Moen and S. P. Schneider, June, 273–277.

A Small Wind Tunnel Significantly Improved by a Multi-Purpose, Two-Flexible-Wall Test Section, P. Kankainen, E. Brundrett, and J. A. Kaiser, September, 419–423.

Interpreting Orthogonal Triple-Wire Data From Very High Turbulence Flows, P. K. Maciejewski and R. J. Moffat, September, 463–468.

Flow Structure in a Radial Flow Pumping System Using High-Image-Density Particle Image Velocimetry, O. Akin and D. Rockwell, September, 538–544.

Preston-Static Tubes for the Measurement of Wall Shear Stress, Josef Daniel Ackerman, Louis Wong, C. Ross Ethier, D. Grant Allen, and Jan K. Spelt, September, 645–649.

FLOW THROUGH POROUS MEDIA

Flow Through Porous Media of Packed Spheres With Water, Ifiyenia Kececioglu, and Yuxiang Jiang, March, 164–170.

FLUID MACHINERY

Experimental Results for the Rotordynamic Characteristics of Leakage Flows in Centrifugal Pumps, A. Guinzburg, C. E. Brennen, A. J. Acosta, and T. K. Caughey, March, 110–115.

Performance Prediction by Viscous Flow Analysis for Francis Turbine Runner, T. C. Vu and W. Shyy, March, 116–120.

An Investigation of Nucleating Flows of Stream in a Cascade of Turbine Blading-Wake Traverses, F. Bakhtar, M. Ebrahimi, and R. A. Webb, March, 121–127.

Ship's Propulsion Mechanism of Two-Stage "Weis-Fogh" Type, Michihisa Tsutahara, Takeyoshi Kimura, and Kideok Ro, June, 278–286.

Power Augmentation Effects of a Horizontal Axis Wind Tunnel With a Tip Vane—Part 1: Turbine Performance and Tip Vane Configuration, Yukimaru Shimizu, Takaya Yoshikawa, and Shinji Matsumura, June, 287–292.

Power Augmentation Effects of a Horizontal Axis Wind Turbine With a Tip Vane—Part 2: Flow Visualization, Yukimaru Shimizu, Takaya Yoshikawa, and Shinji Matsumura, June, 293–297.
Electromagnetic Pump With Thin Metal Walls, N. Ma, T. J. Moon, and J. S. Walker, June, 298–302.
Flow Characteristics of a Centrifugal Pump, C. H. Liu, C. Vafidis, and J. H. Whitelaw, June, 303–309.
Preliminary Design of Centrifugal Impellers Using Optimization Techniques, Sarim Al-Zubaidy, June, 310–315.
An Experimental Investigation of Cross-Flow Turbine Efficiency, Venkappayya R. Desai and Nadim M. Aziz, September, 545–550.
A Correlation of Leakage Vortex Cavitation in Axial-Flow Pumps, K. J. Farrell and M. L. Billet, September, 551–557.
Rotordynamic Effects of the Shroud-to-Housing Leakage Flow in Centrifugal Pumps, E. A. Baskharone, A. S. Daniel, and S. J. Hensel, September, 558–563.
Perturbed Flow Structure in an Annular Seal Due to Synchronous Whirl, E. A. Baskharone, September, 564–569.
Development of Prototype Pump Using a Vibrating Pipe With a Valve, Hiroyuki Hashimoto, Hirokuni Hiyama, and Rokuro Sato, December, 741–745.
Hydrodynamics and Erosion Modeling of Fluidized Bed Combustors, Chunyuan Li and Victor Zakkay, December, 746–755.

FLUID-STRUCTURE INTERACTIONS

Perspective: Numerical Simulations of Wakes and Blade-Vortex Interaction, Dean T. Mook and Bonian Dong, March, 5–21.
Quantitative Visualization of Surface Flows on Rotating Disks, H.-M. Tzeng, A. C. Munce, and L. Crawforth, September, 494–498.
Velocity Characteristics of a Confined Highly-Turbulent Swirling Flow Near a Swirl Plate (Data Bank Contribution), R. X. Shi and B. Chehroudi, December, 685–693.
Computational Study of Disk Driven Rotating Flow in a Cylindrical Enclosure, E. Lang, K. Sridhar, and N. W. Wilson, December, 815–820.
Flow of Newtonian and Non-Newtonian Fluids in a Concentric Annulus With Rotation of the Inner Cylinder, J. M. Nouri and J. H. Whitelaw, December, 821–827.
Ventilated Flow Between Corotating Disks With Large Obstructions in a Fixed Cylindrical Enclosure (Data Bank Contribution), D. Gor, J. A. C. Humphrey, R. Greif, December, 828–834.
Computational Study of Resonance Suppression of Open Sunroofs, D. K. Ota, S. R. Chakravarthy, T. Becker, and T. Sturzenegger, December, 877–882.

FREE SURFACE FLOWS

Efficient Simulation of Short and Long-Wave Interactions With Applications to Capillary Waves, D. G. Dommermuth, March, 77–82.
Interpreting Vortex Interactions With a Free Surface, E. P. Rood, March, 91–94.
The Initialization of Vortical Free-Surface Flows, D. G. Dommermuth, March, 95–102.
A Note on Irrotational Curvilinear Flow Past a Weir, Amruthur S. Ramamurthy, Ngoc-Diep Vo, and R. Balachandar, June, 378–381.
Marangoni Convection With a Curved and Deforming Free Surface in a Cavity, G. P. Sasmal and J. I. Hochstein, September, 577–582.
The Effect of Interfacial Waves on the Transition to Slug Flow, Eugene Kordyban and Abdul Hakim Okleh, September, 583–591.

GENERAL TOPICS

The Prediction of Velocity and Temperature Profiles in Gravity Currents for Use in Chilled Water Storage Tanks, J. T. Nakos, March, 83–90.
Mass Imbalance Error of Waterhammer Equations and Leak Detection, Chyr Pyng Liou, March, 103–109.
Weak Thermal Vortex Rings, R. Ganapathy, March, 174–176.
Perspective: Some Research Needs in Convective Heat Transfer for Industry, Julimae McEligot and Donald M. McEligot, September, 398–404.
A Study of Blast Effects Inside an Enclosure, P. C. Chan and H. H. Klein, September, 450–455.
A Preliminary Parametric Study of Electroheological Dampers, Z. Lou, R. D. Ervin, and F. E. Filisko, September, 570–576.
Falling Needle Rheometry for General Viscoelastic Fluids, R. Zheng, N. Phan-Thien, and V. Ilic, September, 619–624.
Rankine-Hugoniot Relations for Lennard-Jones Liquids, Akira Satoh, September, 625–630.
Structure of the Mean Velocity and Turbulence in Premixed Axisymmetric Acetylene Flames, M. Matovic, S. Oka, and F. Durst, September, 631–642.
A Simple Method for Estimating Velocity Distributions in Swirling Flows, D. Kinnear and P. A. Davidson, December, 694–701.
Assessment of the Martin-Hou Equation for Modeling of a Nonclassical Fluid, G. Emanuel, December, 883–884.

JET FLOWS

An Improve Model for Radial Injection Between Corotating Disks, A. Abrahamson and S. Lonnes, June, 255–257.
Splattering During Turbulent Liquid Jet Impingement on Solid Targets, Sourav K. Bhunia and John H. Lienhard, V, June, 338–344.
High Speed Liquid Impact Onto Wetted Solid Surfaces, H. H. Shi, J. E. Field, and C. S. J. Pickles, June, 345–348.
A Numerical Study of Confined Turbulent Jets, J. Zhu and T.-H. Shih, December, 702–706.
Predictions of the Structure of Turbulent, Moderately Underexpanded Jets, P. S. Cumber, M. Fairweather, S. A. E. G. Falle, and J. R. Giddings, December, 707–713.
On the Dynamics of Flow Structure Development in an Excited Plane Jet, Fei-Bin Hsiao and Jiann-Min Huang, December, 714–720.
Surface Disturbance Evolution and the Splattering of Turbulent Liquid Jets, Sourav K. Bhunia and John H. Lienhard V, December, 721–727.
The Wave-Thinning and Breakup of Liquid Sheets, T. M. Spielbauer and C. K. Aidum, December, 728–734.
Recirculation in an Annular-Type Jet Pump, Donald F. Elger, Sam J. Taylor, and Chyr P. Liou, December, 735–740.

MULTIPHASE FLOWS

Development of a k-ϵ Model for Bubbly Two-Phase Flow, M. Lopez de Bertodanao, R. T. Leahy, Jr., and O. C. Jones, March, 128–134.
Analysis of Linear Encroachment in Two-Immiscible Fluid Systems, Vijayaraghavan Srinivasan and Kambiz Vafai, March, 135–139.
Determination and Characteristics of the Transition to Two-Phase Slug Flow in Small Horizontal Channels, M. W. Wambsganss, J. A. Jendrzejczyk, and D. M. France, March, 140–146.
Average Physical Parameters in an Air-Water Two-Phase Flow in a Small, Square-Sectional Channel, J. K. Keska and R. D. Fernando, June 247–254.
Two-Phase Velocity Distributions and Overall Performance of a Centrifugal Slurry Pump, T. Cader, O. Masbernat, and M. C. Roco, June, 315–223.
Droplet Dynamics Near the Wall in a Vertical Rectangular Duct, M. R. Wang, D. Y. Huang, and Y. C. Liu, June, 349–353.

Droplet Sizing Using the Shifrin Inversion, R. Albert and P. V. Farrell, June, 357–362.
Phase Distribution of High-Pressure Steam-Water Flow at Large-Diameter Tee Junctions (Data Bank Contribution), M. T. Rubel, B. D. Timmerman, H. M. Soliman, G. E. Sims, and M. A. Ebadian, September, 592–598.
Thermal Choking Due to Nonequilibrium Condensation, Abhijit Guha, September, 599–604.
An Experimental Investigation of Throughflow Velocities in Two-Dimensional Fluidized Bed Bubbles: Laser Doppler Anemometer Measurements, M. Gautan, J. T. Jurewicz, and S. R. Kale, September, 605–612.
A Numerical Treatment for Attached Cavitation, Yongliang Chen and Stephen D. Heister, September, 613–618.
Detailed Measurements of Vertical Annular Two-Phase Flow—Part I: Drop Velocities and Sizes, B. J. Azzopardi and J. C. F. Teixeira, December, 792–795.
Detailed Measurements of Vertical Annular Two-Phase Flow—Part II: Gas Core Turbulence, B. J. Azzopardi and J. C. F. Teixeria, December, 796–800.
Spin-Up From Rest of a Two-Layer Liquid in a Cylinder, Kan Yeop Kim and Jae Min Hyun, December, 808–814.

PARTICULATE FLOW

Boundary Layer Theory for a Particulate Suspension, A. J. Chamkha and J. Peddieson, Jr., March, 147–153.
Numerical Simulation of Heavy Particle Dispersion—Scale Ratio and Flow Decay Considerations, Lian-Ping Wang and David E. Stock, March, 154–163.
Analytical Solutions for Flow of a Dusty Fluid Between Two Porous Flat Plates, Ali J. Chamkha, June, 354–356.
Numerical Simulations of a Dilute Particulate Flow (Laminar) Over Tube Banks, Yong-Du Jun and Widen Tabakoff, December, 770–777.
Effect of Selective Modification of Turbulence on Two-Equation Models for Particle-Laden Turbulent Flows, K. D. Squires and J. K. Eaton, December, 778–784.
Particulate Mixing and Volumetric Expansion in a Vibrated Granular Bed, M. L. Hunt, S. S. Hsiau, and K. T. Hong, December, 785–791.

PIPE, DUCT, CHANNEL FLOWS

Origin and Decay of Longitudinal Vortices in Developing Flow in a Curved Rectangular Duct (Data Bank Contribution), Wu J. Kim and Virendra C. Patel, March, 45–52.
Fluid Flow Behavior in the Curved Annular Sector Duct, G. Yang and M. A. Ebadian, March, 53–60.
Steady Laminar Fluid Flow Through Variable Constrictions in Vascular Tube, T. S. Lee, March, 66–71.
Flow in a Channel With Longitudinal Ribs, C. Y. Wang, June, 233–237.
Characteristics of Swirling Flow in a Circular Pipe, Hui Li and Yuji Tomita, June, 370–372.
Mean Separation and Reattachment in Turbulent Pipe Flow Due to an Orifice Plate, N. K. Agarwal, June, 373–376.
Time-Dependent Conjugate Heat Transfer Characteristics of Self-Sustained Oscillatory Flows in a Grooved Channel, J. S. Nigen and C. H. Amon, September, 499–507.
Experimental Correlations to Predict Fluid Resistance for Simple Pulsatile Laminar Flow of Incompressible Fluids in Rigid Tubes, F. M. Donovan, Jr., R. W. McIlwain, D. H. Mittmann, and B. C. Taylor, September, 516–521.
Flashing Flow Discharge of Initially Subcooled Liquid in Pipes, Joseph C. Leung and William H. Ciolek, September, 643–645.
On the Compressible Flow Losses Through Abrupt Enlargements and Contractions, Predrag Marjanović and Vladan Djordjević, December, 756–762.
Unsteady Flow in Diffusers, A. H. M. Kwong and A. P. Dowling, December, 842–847.

SEPARATION

Comparison of the Triple-Deck Theory, Interactive Boundary Layer Method, and Navier-Stokes Computation for Marginal Separation, Chao-Tsung Hsiao and Laura L. Pauley, March, 22–28.
Separated-Reattaching Flow Over a Backstep With Uniform Normal Mass Bleed (Data Bank Contribution), Yang, Jing-Tang, Tsai, Bor-Bin, and Tsai, Go-Long, March, 29–35.
LDV Measurements in Separated Flow on an Elliptic Wing Mounted at an Angle of Attack on a Wall, R. N. Parthasarathy, A. I. Sirviente, and V. C. Patel, June, 258–264.
Response of Two-Dimensional Separation to Three-Dimensional Disturbances, Laura L. Pauley, September, 433–438.

STABILITY AND TRANSITION

The Stability of Pipe Entrance Flows Subjected to Axisymmetric Disturbances, D. F. da Silva and E. A. Moss, March, 61–65.
Review: Laminar-to-Turbulent Transition of Three-Dimensional Boundary Layers on Rotating Bodies, Ryoji Kobayashi, June, 200–211.
Experimental Determination of Transition to Turbulence in a Rectangular Channel With Eddy Promoters, J. S. Kapat, J. Ratnathicam, and B. B. Mikic, September, 484–487.

TURBULENT FLOWS

Simulation of the Turbulent Flow Inside the Combustion Chamber of a Reciprocating Engine With a Finite Element Method, Y. Mao, M. Buffat, and D. Jeandel, June, 363–369.
The Wavenumber-Phase Velocity Representation for the Turbulent Wall-Pressure Spectrum, Ronald L. Panton and Gilles Robert, September, 477–483.
The Effects of Weak Interaction and Reynolds Number on Boundary Layer Scalars With Tandem Turbulent Spots, M. H. Krane and W. R. Pauley, September, 653–656.
Experimental Study of Interactions of Shock Wave With Free-Stream Turbulence, A. Honkan, C. B. Watkins, and J. Andreopoulos, December, 763–769.
Measurements of the Turbulence Structure Downstream of a Tube Bundle at High Reynolds Numbers, U. Karnik, December, 848–855.
A New Correlation for Pressure Drop in Arrays of Rectangular Blocks in Air-Cooled Electronic Units, M. Molki, M. Faghri, and O. Ozbay, December, 856–861.
